

# CASAS Adult Life Skills Test

The Adult Life Skills series allows instructors to monitor the learning progress of those with intellectual disabilities and other beginning literacy needs. The series allows test-takers to respond in their preferred mode of communication, thus enriching the testing experience. This series assesses progress in reading comprehension at four levels, 2A to 5A, pre-beginning to beginning literacy. Tests are administered one-on-one. The series uses a customized appraisal test to determine the appropriate pretest for each individual.

- Four test levels, two forms at each level
- Appraisal and tests have color photos (see sample test items on pages 2-5)
- One-on-one test administration with script for proctor

## How does the Adult Life Skills tests work with the CASAS system and scale scores?

210	<b>B</b>	Fill out simple forms; calculate single mathematical operations
200	<b>A</b>	Write simple words and phrases; provide very basic personal information
190	<b>AA</b>	Use simple communication with others and community services
180	<b>AAA</b>	Follow simple safety practices in home/community and directions on public signs
160	<b>AAAA</b>	Perform daily living tasks; identify simple public signs
140	<b>AAAAA</b>	Identify household objects; use gestures to communicate
