PoPs –Reminder of Policy

- ▶ A Period of Participation (PoP) begins when an individual enters the program.
- ▶ A PoP ends at program exit (90 days without service and no scheduled services).
- ▶ A PoP *does not* end when a program year ends.

PoPs –Implications

Participant Status

1. An individual becomes a participant once he/she has attained 12 hours of instruction within a period of participation (PoP).
2. Participant status is retained until an exit occurs.
3. Individuals must achieve participant status each time a new PoP begins.

PoPs –Implications

Participant Status (continued)

-  4. Participants who remain continuously enrolled across multiple program years do not need to requalify as a participant in new program years.

 - 5. Measurable Skill Gain (MSG) is reported at least once for every participant per program year.
-

Q: Why is the number of students in Table 4 and 4B different?

A: Table 4 includes all learners who qualify for WIOA II reporting, while Table 4B only includes students with a pretest and a post-test.

Q: Table 4 has ABE L6 and 4B doesn't. Why is that?

A: For the ABE6 EFL, there is no way for a student to achieve a gain other than earning the HS diploma or HSE. There is no way to earn a gain through pre/post-testing, so for “fairness” in accurately reporting student outcomes, this level is not included.

Q: On Table 4, there is Column E for "Number who have achieved at least one EFL gain" and on Table 4B, there is a column for Number with EFL gain. Is there any significance to this wording difference?

A: This is on purpose. Table 4 reports other Measurable Skills Gains in addition to pre/post-testing, whereas Table 4B is focused only on results from testing.

Tale of the Tape: NRS Table 4 vs. NRS Table 4B

Q: The number of EFL gains in Table 4B is sometimes higher... in some cases significantly higher. Should the number of gains be the same on both tables?

A: Usually this will occur for students that earn a pre/post-test level gain in addition to another Measurable Skills Gain.

On Table 4, different types of MSG's are reported, but ultimately only one MSG per student per PoP is allowed. TE prioritizes both HSE and HS diploma ahead of pre/post-test gains, so if a student earns HSE or HS diploma, and also achieves a pre/post level completion, then the pre/post gain is usually not reported on Table 4.

Table 4B, on the other hand, only displays pre/post-test data, and ignores other outcomes such as HSE and HSD – so for that same example above where a student earned both HSE/HSD and a pre/post-test level gain – on Table 4B, the pre/post gain will be reported.

Tale of the Tape: NRS Table 4 vs. NRS Table 4B

Q: Shouldn't the totals in Column L in Table 4 and Column D in Table 4B be the same?

A: Not necessarily.

- Column L on Table 4 is factoring in multiple Periods of Participation (PoPs) -- so if students have more than one PoP in a year, that could increase the total of MSG's reported on Table 4 and may be another reason for why these two tables may vary.
- Table 4 is counting different types of MSG's, so in cases when students are earning these outcomes outside of pre/post-testing, then these columns will be different.

Example: Student enrolls in ASE for one PoP, achieves a pre/post-test gain, and also completes the GED.

- Table 4 reports the GED. Because it only reports one MSG per student, it does not report the pre/post-test gain.
- Table 4B only reports pre/post – so 4B reports the pre/post-test gain.
