## How to Take Exam / 如何参加考试 / Cómo tomar el examen / 시험 응시 방법

There are two options for taking this mandatory exam. The first option is to take the exam in-person, in a classroom. We will maintain a clean testing environment by sanitizing all surfaces and testing equipment in the classroom, before and after each session. Additionally, hand sanitizer will be available for you onsite. To ensure your safety, we will be limiting the number of students in the testing room to adhere to social distancing guidelines of remaining 6-feet apart from each other. Masks are required to be worn at all times by both the assessment technicians and all testers. Doors will be left open to ensure proper air flow. Finally, an assessment technician will be able to provide you with assistance to troubleshoot computer issues and/or guiding you through the examination process. If you do not feel comfortable taking the exam in-person, your second option is to take the test at home. You will need to meet all computer requirements, discussed later in this form. Be advised this option is not recommended for those not comfortable using a computer and/or Zoom.

# Using CASAS Guidelines 1:5 – Test Lab Setup

Once the following has taken place:

- all rooms have been assigned,
- all students have been given the remote access code
- all students are ready to start

The proctor will click (open all rooms) and move to the logged in computers to accept all their multiple selves into each breakout room.

End result - can visibly see each student in each breakout room on computer screens without having to navigate to each breakout room on one computer.

# Proctor Feedback (Pros and Cons)

---

- Students choose testing modality
- Provide students with 21 Century Skills
- Registration easy to understand
  - Step by step instructions
  - Multiple languages
- **Calendly** is user friendly
  - No need to constantly make appointments
  - Easy to look up testers

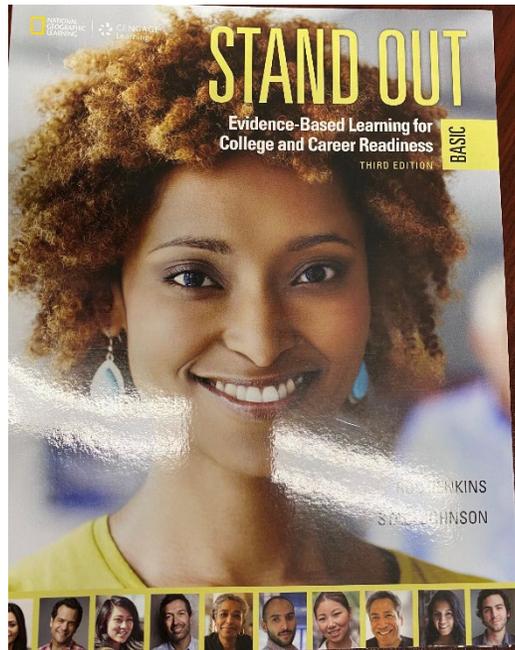

- Language Barrier
  - Transition student from multiple testers to another computer that is open for remote control access
- Need to have “extra” computer in lab in order to troubleshoot
- Lack of flexibility
- Students share **Calendly** link instead of registration link
