The Adult Education Test Development and Research Leader

Comprehensive Adult Student Assessment Systems

CASAS tests assess basic and academic skills in real-world contexts. Our system monitors progress in reading, math, English language, writing, and work-readiness skills.

CASAS is the most widely used adult education competency-based testing system in the United States.

www.casas.org
CASAS eTests is our premier web-based testing system. Programs purchase web-test units (WTUs) that never expire and are usable with any test in the online system. CASAS eTests saves time and money by giving a Locator in place of an Appraisal (placement) test. At the end of the Locator, the system seamlessly moves the student into the appropriate pretest.

Data Collection and Accountability Software

TOPSpro Enterprise makes accountability quick, easy, and efficient. Our software offers numerous reports that meet the accountability, program, and instructional needs of administrators, teachers, and students.

**INSTRUCTORS**
benefit from automated test scoring and learning gains calculations and are able to plan curriculum and instruction based on content standards and competencies.

**ADMINISTRATORS AND POLICYMAKERS**
know they can rely on the system to aggregate statewide data and meet federal reporting requirements.

**STUDENTS**
know the system tracks their progress along every step of their educational path. Reports guide the learning process.

The Testing Process

Placement

Use Locator or Appraisal to find appropriate pretests and place students in program.

Pretest

Use pretests to place students into appropriate NRS Educational Functioning Level and identify instructional needs.

Instruction

Use pretest results to guide teaching. Use QuickSearch Online to find curriculum resources.

Post-test

Use post-tests to measure gains and Educational Functioning Level.

Achieve Goals

Postsecondary and Workforce

Start-Up Menu

Placement

The integrity and quality of testing is a top priority at CASAS. Therefore, completing a training workshop is necessary to ensure valid and reliable results.

Our customized workshops focus on using CASAS to its full advantage. Participants are confident they can rely on CASAS as today's testing and technology choice.

Enrolling in a training workshop is easy. Many are available online at training.casas.org at no cost. Face-to-face training by a state-level certified trainer is always available. Training is offered at our National Summer Institute also.

Training Workshops

The three-day Institute offers training sessions, workshops, workgroups, and featured speakers. The focus is on current issues and concerns in adult education—the latest in test development, new technology and resources, and sharing best practices.

www.casas.org/si

Join us in June at the Summer Institute in Southern California. You will meet and work with administrators, instructors, workforce specialists, and others making a difference in the lives of millions of youth and adult learners and workers.
Our Credentials

CASAS is approved by the U.S. Department of Education and the U.S. Department of Labor and is used nationally and internationally.

Members of the CASAS National Consortium, a field-based advisory group of state leaders in adult education and workforce development, and representatives from business and industry, work throughout the year to identify the assessment and research needs of the groups they represent.

CASAS reading and math tests are approved for NRS* reporting in Adult Basic Education, Adult Secondary Education, and English Language programs.

CASAS listening tests are approved for English Language programs.

*The National Reporting System (NRS) for Adult Education is an outcome-based federal reporting system administered by the U.S. Department of Education, Office of Career, Technical, and Adult Education.
